### Course Details

#### CERTIFICATE IN DOWNSTREAM OPERATIONS

The **OGS Certificate in Downstream Oil & Gas Operations** brings together the essential skills to pursue a successful career in the oil industry. Join other leading downstream companies like Sahara Energy, Gulf Treasures, A-Z Petroleum, Integrated Oil, Capital Oil, Prudent Energy, etc, to strengthen your capacity for sustainable growth in an increasingly volatile industry sector.

#### Benefits of the programme

The oil and gas industry has enormous opportunities running into billions of dollars. However, it is also known to be highly complex, technical in nature, very capital intensive and risky. Doing business in the industry starts with making sense of these complexities in order to be able read the trends correctly, and identify probable threats and opportunities. Participants enjoy:

- Training by qualified industry practitioners who help you makes sense of the business drivers of the industry.

- Double qualifications, including international certification - Certificate in Downstream Operations
- IMIST (oil and gas safety certification from OPITO, UK)

All round learning which includes:

- Core training in downstream operations: - Depot and Tank farm operations

- Petroleum product marketing
- International crude oil trading
- Refinery and other downstream derivative products
- Natural gas marketing and distribution

- Essential Business Skills: - Petroleum product management
- Business Finance
- Entrepreneurship

With the international safety certification, participants are able to demonstrate better safety behaviour at work and influence safety culture generally.

Opportunity to network with over 1,000 professionals on the OGS Alumni network
